How to use backgrounds for Boot Hill 3rd Edition

When a player creates a character he may select one background for his character. The background resembles a profession that the character has been trained in and has practised in his/her past. It can also reflect a general background for the Character – i.e how the character used to live his life or spend his live.

Whatever the reason, the character has achieved experience (if lifestyle/background) or training (if profession) by living this life.

To reflect the expertise gained from the selected background the player can select one free bonus skill for his character.

Next to each background is a list of working skills and/or weapon skills.

Working skills are all gained at a score of 15 – which reflects the expertise gained is at a fairly good level.

Weapon skills are all gained at a score of 1 – reflecting the character has become proficient with the particular type of weapon.

After having decided which background to assign to his character, the player can pick one of the listed skills and add this to his skills on the character sheet. This bonus skill does not count towards how many skills the player can select as standard looking at the sum of his attribute scores or to rule that at least half of the standard points must be used on working skills

Two of the categories of backgrounds (**Rich folk** and **The Law**) are restricted categories. These can only be picked if the Judge allows this and it can fit reasonably within the campaign and if it makes sense looking at the description the player makes in his background story.

Small pistols

Colt Derringer

Generally the smallest usable handgun. It was frequently used by women, because it is easily concealable in a purse or as a stocking gun. Such weapons designed specifically for women were called "muff pistols", due to their compact size enabling them to be carried in a muff.

Small pistol Single action 5 0.22 1 shot

Remington Double Derringer

The Remington derringer design doubled the capacity, while maintaining a compact size, by adding a second barrel on top of the first. Each barrel then held one round. It can be used in fights, but at very close range, such as at a casino or saloon card table, it could easily kill. The Remington achieved widespread popularity over all other designs, becoming synonymous with the word "Derringer"

Small pistol, Double barrel Single action 10 0.22 2 shots

Knuckle-duster

Easy to conceal and with a unique design made the weapon a handy bludgeoning weapon as well if entering a brawl. Both a firearm and a Brass Knuckle in one weapon. It is said that the weapon gets its name from leaving gunpowder dust on the shooters hand when fired

Small pistol Single action 10 0.22 1 shot

Sharps Pepperbox

One of the more common derringers found in the "Old West" were the Sharps Derringers. They are four-barrel, single-action pepperbox derringers with a revolving firing pin. Their four barrels slide forward to load and unload. These first model derringers had brass frames and fired the recently introduced .22 Rimfire metallic cartridges.

Pistols

Smith and Wesson

This weapon relied on the loading of loose powder and ball, and although this meant that the gun would be slow to load, the method was practical and dependable. During the American civil war, the majority of revolvers were cap and ball. Caband Ball revolvers has a small chance of exploding if weapon misfires due to all rounds going off at once.

Starr

Double action revolver that performs three actions during a trigger pull: Automatically cocks the hammer, releases the hammer to fire the weapon and rotates the cylinder. This mechanism comes with a downside as the trigger is requires a harder pull compared to a single action revolver, thus making it a bit slower. However first shot is faster than a single action revolver that must manually be cocked.

Remington 	<p>Single action revolver is the pistol type became the most frequently used after the Cab & Ball revolver. Single action means that the hammer strikes every time the trigger is pulled. However the hammer must be manually cocked before every shot to rotate the cylinder. This comes with a -1 initiative penalty downside - but this is outweighed by the trigger is easier and faster to pull.</p>	Normal Revolver	Single action	30	0.38	6 shots
Griswold 	<p>The Griswold Revolver was produced in Griswoldville, Georgia between 1862-1864. Used in the South States and by the Confederations army. The frame and trigger guard is brass. The grips are one piece walnut. They are marked with a serial number along with assembly numbers, inspector's mark and benchmarks</p>	Normal Revolver	Single action	40	0.38	6 shots
Colt 1873 	<p>Fast draw revolver with shortened barrel and limited weight compared to other revolvers. Both enabling a faster draw from a holster. Often the cock was placed a bit higher making it easier to do fangunning if needed.</p>	Fast Draw Revolver	Single action	40	0.38	6 shots
Colt Buntline 	<p>The Colt Buntline Special is a long-barreled variant of the Colt Single Action revolver with extended barrel of 12-16 inches. Due to the long barrel it is slower to pull, but offers an extended shooting range and as the only type of revolver this can be used for sniping similar to rifles (resting the barrel on some support to gain +1 sniping accuracy modifier)</p>	Long Barrel Revolver	Single action	50	0.45	6 shots

Rifles

Springfield		The Springfield Model 1861 was a musket shoulder-arm used by the United States Army and Marine Corps during the American Civil War. Named after its original place of production, Springfield, Massachusetts, it was favored for its range, accuracy, and reliability. The Springfield had a general effective range of 200 to 300 yards, but could reliably hit man sized targets out to 500 yards	Musket	Powder, Muzzle load	12	0.58	1 shot
Kentucky Rifle		The long rifle, also known as Kentucky rifle, was one of the first commonly used rifles for hunting and warfare. It is characterized by an unusually long barrel. The long rifle uses rifling, which causes the projectile to spin around and increase the stability of its trajectory and dramatically improved accuracy over contemporary smooth bore muskets, which were cheaper and more common.	Muzzle-loading Rifle	Powder, Muzzle load	17	0.45	1 shot
Sharps Rifle		Sharps rifles are a series of large-bore single-shot breech loading rifles. They were renowned for long-range accuracy. By 1874 the rifle was available in a variety of calibers, and had been adopted by the armies of a number of nations. . Also commonly used as sporting rifle for commercial buffalo hunting and competitive game hunting	Single Barrel Rifle	Breech Loading	20	0.45	1 shot

Colt Rifle 	<p>The design of the Colt Revolving rifle was essentially similar to teh colt pistol, with a rotating cylinder that held six rounds of same 0.38 caliber as the standard colt. Colt revolving pistols and rifles were attractive mainly because of their high rate of fire making them average speed. However the downside was it takes some time to reload.</p>	Revolving Cylinder Rifle	Cylinder loading	28	0.38	6 shots
Spencer Rifle 	<p>The Spencer Repeating Rifles were early American lever action firearms. The Spencer was the world's first military metallic cartridge repeating rifle. The Spencer repeating rifle was adopted by the Union Army cavalry, during the Civil War but did not replace the muzzle-loading rifled muskets in use at the time. The Confederates occasionally captured some of these weapons and ammunition</p>	Lever action Rifle (6)	Turbular magazine	30	0.58	6 shots
Henry Repeating Rifle 	<p>The Henry repeating rifle is a lever-action, tubular magazine rifle famed both for its use at the Battle of the Little Bighorn and being the basis for the iconic Winchester rifle of the American Wild West. It was adopted in small quantities by the Union in the Civil War. Many later found their way West, notably in the hands of the Sioux and Cheyenne.</p>	Lever action Rifle (9)	Turbular magazine	40	0.45	9 shots
Winchester 1866 "Yellow Boy" 	<p>Developed from the 1860 Henry rifle, the Winchester 1866 rifle was nicknamed the "Yellow Boy" because of its receiver of a bronze/brass alloy called gunmetal. It was famous for its rugged construction and lever-action "repeating rifle" mechanism that allowed the user to fire a number of shots before having to reload.</p>	Lever action Rifle (12)	Turbular magazine	70	0.45	12 shots

Heavy Weapons

Gatlin Gun		<p>The Gatling gun is the best-known early rapid-fire spring loaded, hand cranked weapons, and a forerunner of the modern machine gun and rotary cannon. Invented by Richard Gatling, it saw occasional use by the Union forces during the American Civil War. The Gatling gun's operation centered on a cyclic multi-barrel design which facilitated cooling and synchronized the firing-reloading sequence. Each barrel fired a single shot when it reached a certain point in the cycle, after which it ejected the spent cartridge, loaded a new round, and, in the process, allowed the barrel to cool</p>	Semi automatic weapon	40 round Cartridge	N/A	0.58	40 Shots
Cannon		<p>Civil War artillery played a very important part during the American Civil War. It was used against infantry, buildings, fortifications, and ships. Artillery was limited during the Civil War to firing at targets the gunners could actually see. There were no forward observers who could direct fire onto a target. Artillery fought side by side with the infantry on the battlefield. Most artillery during the Civil War were muzzle loading guns.</p>	10 or 12 Pounder cannon	Cannon Balls	N/A	10/12 Pounder	1 Shot

Healing & Wounds

Version 3.0 June 2019

Wounds threshold

A character can suffer from an amount of wound points up to his STR score. When reaching STR score character fall unconscious and remains unconscious until number of wounds is reduced below STR score.

Healing from wounds can happen i three ways:

- 1) **Medical care:** a successfull Medicine check by a skilled person followed by rest.
- 2) **Treatment or consumption:** using herbs, drugs, plants or other remedy
- 3) **A combination:** Combining both 1 and 2 for faster recovery or temporary painkilling.

Healing from wounds

Light wounds *does not* start to heal before character has undergone a successfull medical care check.

Light wounds can also be removed by some herbs/medicine as well or effects postponed temporarily.

Serious wounds *does not* start to heal before character has undergone a successfull medical care check. So this step is *always* needed.

However various other treatment or consumption of medicine, herbs and and drugs can teporarily postpone penalties suffered from serious wounds or help speed up the recovering process after successfull medical care has been recieved.

If a serious wounds does not recieve medical care within 10 days a chacter must make a luck roll.

If successfull the wounds starts healing as ifit had revieced medical care.

If luck roll is unsuccessful then the wound has gone septic and the character dies.

Mortal wounds *cannot* be treated by any means.

Only a successfull luck roll when getting a mortal wound can change it into a light wound with 1 wound point.

Otherwise characters die from a mortal wound.

Medical care

A Character who has recieved successfull medical care start healing at follwing rate:

Recovering from light wounds: 2 wound points per light wound per day. All light wounds are automatically healed after 1 week.

Recovering from serious wounds: 1 wound point per Serious wound per day

Recovering from Mortal wounds: Cannot be recovered, result in death

Herbs, drugs, medicine and mixtures

Two types exists: **Potions** can be consumed as an action during a round and effect is gained instantly. **Treatments** must be applied after a successfull Medicine check has been carried out and wounds are starting to recover. Treatment takes at min. 10 minutes.

Name	Effect	Risk of side effect	Undesired side effect	Value (USD)

Expertise Feats Compendium

Supplement to Boot Hill 3rd Edition

Version 3.0 June 2019

Introduction and background

This compendium list all the available expertise feats that can be added as an option or supplement to the standard Boot Hill 3rd edition rules. This supplement adds an element of player character progression. The missing advancement / character building element has been a criticism to the system compared to e.g. D&D.

Only requirement needed is that players keep track of both the current available XP they have for purchasing skill points and attributes *as well as the total accumulated XP* earned throughout the lifetime of their character.

It becomes harder and harder to further improved ones advanced skills as you move up the expertise level ladder, which is also reflected in the mount of XP needed to be earned for the next tier as you go along.

Total Experience Advancement rule

- When a certain amount of total XP has been earned, the experience of the character grants the character the benefit that a bonus Expertise feat can be selected without any additional XP cost.
- This expertise feat reflects that the character has become more seasoned and experienced and develops his skills and abilities more advance levels
- The character must meet any requirements stated first before the Feat can be selected. The Player is allowed to wait selecting the bonus feat when reaching the XP threshold until the character meets all the requirements
- The same Feat can only be selected once.

Experience advancement table
